

Biopsy Wound Care:

Leave the bandage on and keep dry until tomorrow morning.

After showering, apply a small amount of Vaseline or Aquaphor and cover with a band-aid or gauze and paper tape for 7 days. If left uncovered, apply ointment morning and evening. New scars are particularly sensitive to the sun. Therefore, using SPF 30 or higher or covering with a bandage should be done if exposing the scar to the sun.

Please be aware that you may receive a separate bill from the Pathology Lab.

Biopsy Results:

Results can take up to 2 weeks to get back. We will call you to notify you of your results. If you have not heard from us within 2 weeks, please call our office at (720) 738-7770.
